Veleposlanstvo Države Izrael, Istarska županija i Grad Pazin

u suradnji s

ISRAEL EXPORT INSTITUTE

Israel Export Institute i HGK – Županijskom komorom Pula

pozivaju Vas na

SEMINAR O POLJOPRIVREDI

''Primjena novih tehnologija u poljoprivredi''

koji će se održati u utorak, 20. ožujka 2018. u Spomen domu u Pazin (adresa: Šetalište Pazinske gimnazije 1, Pazin)

s početkom u 10 sati.

Država Izrael ima oko 8.5 milijuna stanovnika. Ukupna zemljopisna površina Države Izrael je oko 22.000 km² i samo 20 % od toga je obradiva površina koja se većinom navodnjava. Na oko 310.000 ha Država Izrael proizvodi većinu svoje hrane, a uvozi žito, uljane sjemenke, meso, kavu, kakao i šećer. Taj je uvoz obilno pokriven izvozom. Proizvodnja na farmama uglavnom se sastoji od mliječnih proizvoda i uzgoja peradi. Dodatno, veliki izbor cvijeća, voća i povrća uzgaja se lokalno, posebno u toplim područjima koje poljoprivrednicima omogućuju prednost u odnosu na europska tržišta. Tijekom zimskih mjeseci, Izrael je europski staklenik iz kojeg se u Europu izvoze lubenice, rajčice, krastavci, paprika, jagode, kivi, mango, avokado, mnoge vrste agruma, ruže i karanfili. Sve navedno je rezultat visoko razvijenih i inovativnih agrotehnologija koje Država Izrael izvozi diljem svijeta.

Seminar će obuhvatiti predavanja iz područja: navodnjavanje, staklenici, uzgoj maslina, mljekarstvo i zaštita bilja prema sljedećem rasporedu:

10:00 1. Projekti staklenika – Itai Rosenberg (20 min)

2. Osnove dizajniranja kap po kap i antifrost sustava – Božidar Žanko (20 min)

3. Navodnjavanje silaže, rajčica i staklenika – Buda Erel (20 min)

4. Proizvodnja maslinovog ulja – Ehud Soriano (45 min)

11:45 Pauza s osvježenjem

12:30 5. Napredna rješenja za upravljanje mliječnim farmama – Branimir Kampl (20 min)

6. Važnost zaštite bilja u uzgoju usjeva – Zlatko Balentic (20 min)

Moderator: Gđa Zvjezdana Blažić

Vrijeme za pitanja i odgovore je predviđeno nakon svakog predavanja.

Ako ste zainteresirani za dodatne razgovore o pojedinom području lijepo Vas molimo da nam javite područje Vašeg interesa na mail s kojeg ste dobili poziv te Vaše osnovne podatke (ime i prezime, naziv tvrtke i adresa, e-mail, telefon, mobitel).

Embassy of the State of Israel, Istria county and the City of Pazin

in cooperation with

ISRAEL EXPORT INSTITUTE

Israeli Export Institute and HGK – County chamber Pula

are inviting you to the

AGRICULTURAL SEMINAR

''The use of new technologies in agriculture''

which will be held on Tuesday, March 20th 2018 in the Spomen dom Pazin (address:, Pazin) at 10 o'clock.

The State of Israel has about 8.5 million inhabitants. The total geographical area of the State of Israel is about 22,000 square kilometers and only 20 % of it is arable land which is mostly irrigated. At about 310,000 ha the State of Israel produces most of its food, but imports wheat, oil seeds, meat, coffee, cocoa and sugar. Imports are highly covered by exports. Production on farms consists mainly of dairy products and poultry. In addition, a great variety of flowers, fruits and vegetables are grown locally, especially in warm areas that allow farmers an advantage over European markets. During the winter months, Israel is Europe's greenhouse from which watermelons, tomatoes, cucumbers, peppers, strawberries, kiwi, mango, avocado, many types of citrus fruits, roses and carnations are exported to Europe. All the above mentioned is the result of a highly developed and innovative agro technologies that the State of Israel exports worldwide.

The seminar will include presentations in 5 fields: irrigation, greenhouses, olives production, dairy and plant protection according to the following schedule:

10:00 1. Greenhouse Projects – Itai Rosenberg (20 min)

2. Basics for designing the drip irrigation and anti-frost systems – Bozidar Zanko (20 min)

3. Silage, tomatoes and greenhouses irrigation – Buda Erel (20 min)

4. Olive oil production – Ehud Soriano (45 min)

11:45 Break with refreshments

12:30 5. Advanced dairy management solutions – Branimir Kampl (20 min)

6. The importance of Plant Protection in Growing Crops – Zlatko Balentic (20 min)

Moderator: Mrs Zvjezdana Blazic

Time for Q&A will be provided after each lecture.

If you are interested in additional meetings about any particular field we kindly ask you to let us know the field of your interest with your basic data (first and last name, name and the address of the company, e-mail, telephone, mobile number) by replying to the e-mail from which you have received this invitation.
